

NEW EFFICIENCY FOR COMPONENT AND WIRE LABELING

Revolutionary Talk'n Label (pat. pending) labeling system with voice recognition saves you time and money.

Talk'n Label by Devoca frees up your hands and eyes to concentrate on the essential – the job. With Talk'n Label, you will vastly improve your efficiency, by up to 50%. Just imagine what the time savings and the error-free labeling will do to your bottom line!

Talk'n Label works for all of your labeling needs. Use it on the job, in your shop, or in the office.

Talk'n Label is simple and intuitive to use. You will create any label you need with only four voice commands. Playback and display will ensure your labels are correct before you print.

The lightweight and rugged printer follows you everywhere you go. Clip it to your belt, attach it to a metal surface, or set it on your desk.

Continue to answer your phone while on the job! The headset and microphone with advanced noise filtering allows for error-free labels, and provides a crisp and clear communication for your calls.
